Profile

I am an ambitious MArch student. Art enthusiast, ex-national athlete, passionate traveler and a friendly person. I excel at group and individual work, with excellent communication and collaboration skills.

Work

FORMA Studio - Plovdiv
March 2018 – June 2019

Architectural Assistant Part I

Working for FORMA Studio – a multi-disciplinary award winning practice helped me develop my time management and professional skills. I was involved in an array of projects – residential schemes, retrofits, high-end single family homes and more. I got to work directly with clients, engineers, interior designers and contractors, building my practical experience. I learned how to use BIM software and how to design in a more pragmatic manner without compromising the qualities of my ideas.

University of Nottingham
September 2020 – Present

Design Tutor

I work as a Year 1 design tutor for the Department of Architecture and Built Environment at Nottingham concurrent to my final year of studies. This role has allowed me to learn through teaching undergraduate students. Balancing my own workload with this job has enhanced my professional skills.

Education

University of Nottingham
MArch Architecture (ARB/RIBA Part 2)
September 2019 - June 2021

Expected Grade 1st

I improved my design skills and my knowledge of theory while studying at Nottingham and was able to pursue my interest in the field of architecture. I was elected the president of the Architecture Society, which helped me build up my leadership skills.

University of Kent
BA(Hons) Architecture (ARB/RIBA Part 1)
September 2014 - June 2017

Grade 2.1

At Kent I learned how to design, draw and present architecture. I was involved in the Peer Mentoring Scheme both as a mentor and a mentee and took active part in university life – being the badminton team's men's 1st team captain.

Università degli Studi di Roma "Tor Vergata"
ERASMUS Term Abroad

Grade 1st (30 e lode)

Living in Rome for a year was a great experience in terms of getting familiar with another country's way of living and architectural ethos. I worked in group projects with engineering students, which helped me improve my communication skills and learn Italian.
